> *the same files in tar archive (archived with RedHat 7.1 tar), extracting*  
> *those with busybox tar (the one in tomsrtbt-1.7.334, which is v 0.51?)*

Whoa whoa whoa.

Tomsrtbt does not include busybox tar.

As of 1.7.339, tomsrtbt uses busybox only for:

BASENAME CHGRP CHMOD CHOWN CHROOT CLEAR CMP DATE DF DIRNAME DMESG DU FDFLUSH  
GREP GUNZIP GZIP HOSTNAME IFCONFIG INSMOD KILL KILLALL KLOGD LENGTH LN  
LOADKMAP LOGGER LS MKDIR MKFIFO MKNOD MKSWAP MT MV NSLOOKUP PING PS PWD  
RESET RM RMDIR ROUTE SED SLEEP STTY SWAPONOFF SYNC SYSLOGD TAIL TEE TELNET  
TOUCH TRUE\_FALSE UPDATE USLEEP WC WGET WHICH XARGS YES

Note: as of 1.7.341, mnsed and sed will be replaced by busybox sed.

Note: as of 1.7.341, a newer CVS pull of busybox will be used.
